

KERALAMATCH

MASTER SOFTWARE SPECIFICATION & GUI COMPONENT DOCUMENTATION

Detailed End-to-End User & Admin Portals Breakdown — Version 1.0

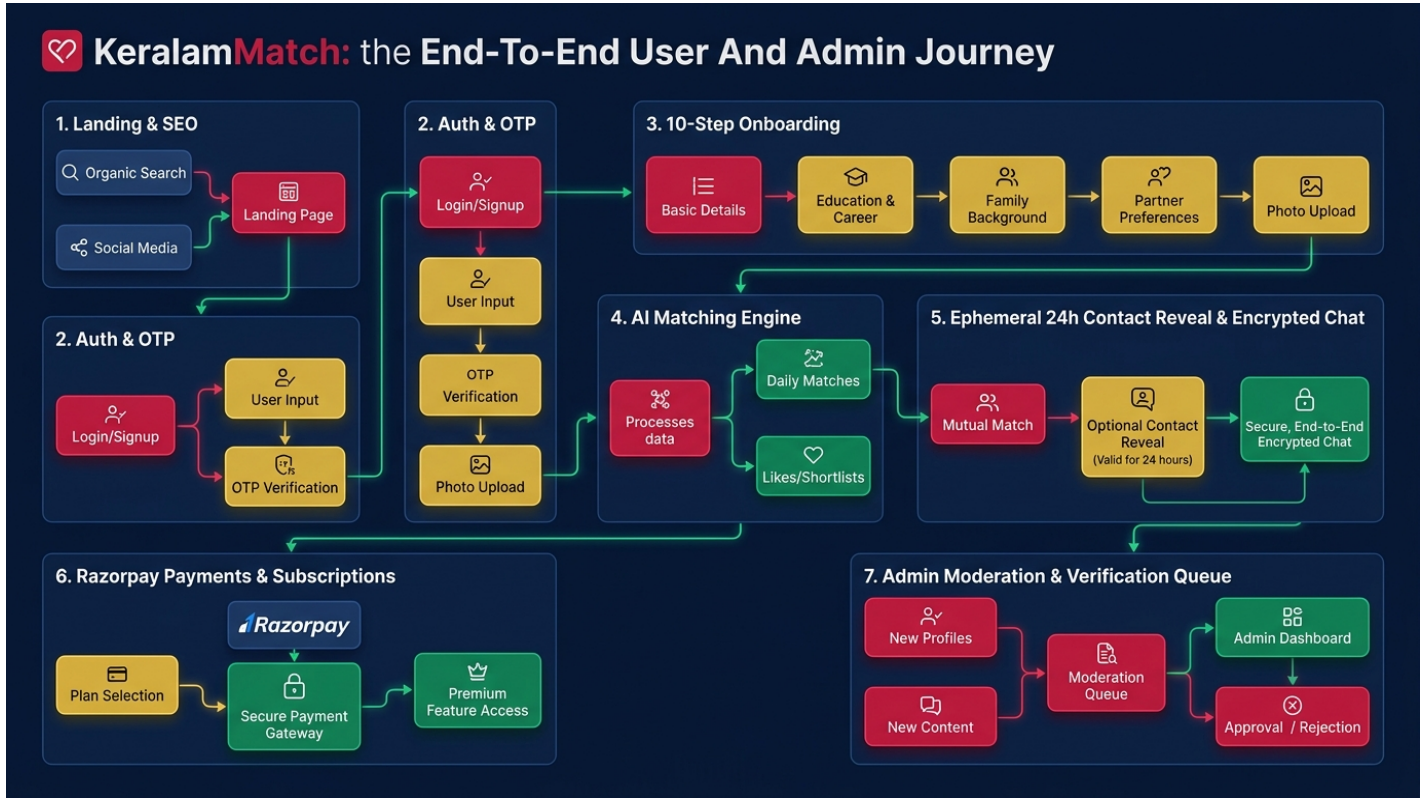

Figure 1: Keralamatch End-to-End User & Admin Journey Flowchart Diagram

1. Executive Overview & Design System

Keralamatch is Kerala's premier privacy-first, verified matrimonial platform tailored for the global Malayali community. The software combines modern web design aesthetics (Warm Ivory #FCFBF7, Deep Navy #0A1F44, Crimson Red #C81D45, and Classic Gold #D4AF37) with Clean Architecture software design patterns, serverless PostgreSQL data storage, and strict privacy controls.

2. Detailed User Portal Pages & GUI Breakdown

2.1 Landing Page (`/`)

Header Logo & Nav, Hero Banner with Kerala Couple Image, Dark Maroon Stat Bar (50,000+ Members, 98% Verified), 3-Column Privacy Feature Cards, District & Community Footer Grid.

3.10 Admin Settings (`/admin/settings`)

Category Menu (General, Site, Email, SMS, Payment, Security, Backup), System Config Form (Site Name, Support Email, Contact Number, Save Button).

4. Technical Mechanics & Underlying Software Flow

- **AES-256 Field Encryption:** Candidate phone & email credentials encrypted at rest prior to DB insertion.
- **24h Ephemeral Reveal Engine:** Consented requests set `expiresAt = now + 24h`. Auto-locks upon expiration.
- **Razorpay Gateway & Webhooks:** Asynchronous payment signature validation and wallet/plan provisioning.
- **Admin Privacy Shield:** Architectural redaction of private chat messages unless flagged for moderation.
